Explanatory Remarks - Camp:

During the inspection at the James Creek camp on July 17, 2024 there was one of concerns observed by the inspector.

There is garbage at the southeast side of the site where all the road signs are stored, it has been accumulating for awhile and should be cleaned up and brought to a proper facility.

The concerns from the last inspection were addressed as there is no more fuel stain by the fuel tanks and the fuel odor is gone.

The rest of the site looks in good order and noticed there are drip trays under all the equipment at the site.

Keep up the good work.
