Re: Request for Modification to Raw Water Intake

Attn: Erica Janes – Regional Specialist

The Town of Fort Smith requests a modification to our Water License to allow for the rehabilitation of our Raw Water Intake (RWI). This work will include replacement of portions of the RWI structure as well as the pumps and associated controls and systems required to upgrade the RWI to a modern standard which will serve the Town for the next 50 years.

Included in this application are Construction Drawings and Construction Specifications for this work which are stamped by an Engineer certified to practice in the Northwest Territories, as well as a November 2022 "Fort Smith Infrastructure Evaluation Study" that establishes the scope of, and need for, this work.

While this work occurs the Town will continue to draw water from the Slave River as per the Town Water License, as well as ensure that all work completed on the RWI meets the expectations of the Mackenzie Valley Land and Water Board.

Please accept this letter and attachments as the Town of Fort Smith's application to modify our Water License to allow for the rehabilitation of our RWI, which is a vital part of Town potable water production infrastructure.

Sincerely,

Tracy Thomas
Senior Administrative Officer
