Hi Mr. McLeod

As you are aware, Apache Canada (Apache) has a Land Use Permit from the Mackenzie Valley Land and Water Board (MVLWB) to conduct remediation activities at the former Pointed Mountain gas field.

I would like to inform you that Apache will be applying to amend one condition of the existing Land Use Permit (MV2014X0011). The condition we would like to amend is Condition 61 of the licence, which requires Apache to submit a Final Remediation Plan to the MVLWB by April 15, 2015. Apache would like to change the required date to June 30, 2015.

We would like this change for the following reasons:

- To provide additional time for interpretation of the 2014 supplemental Phase 2 Environmental Site Assessment analytical findings and development of site specific risk based remediation guidelines;
- To allow continued engagement with the Acho Dene Koe (ADK) First Nation, Metis and local community to facilitate a better understanding of the remediation goals; and,
- To further develop and evaluate remediation options.

We do not anticipate that the proposed change will affect the planned remediation schedule.

We would appreciate your acknowledgement of receiving this e-mail and would like to know if you have any questions or comments on the proposed amendment.

Please feel free to contact Lynn Huntley at lynn.huntley@apachecorp.com if you have questions or comments on any other aspect of the remediation program for Pointed Mountain.
