Good morning Anne,

We have received your request for extension, but it is considered incomplete at this time.

The request will be considered complete after providing notification to the parties identified in the approved engagement plan and an updated engagement log is submitted.

After the extension request is deemed complete, it will go on the Online Review System (ORS) for public review for a total of four weeks (three weeks for comments to come in, one week for your response.) Once the review period is complete, I will package it up and it will go to the first available board meeting for decision.

Extra information on extensions can be found in our LWB Guide to the Land Use Permitting Process in section 6.2 Extensions.

Please let me know if you have any questions,

Tyree

Good Afternoon Emily, Tyree,

I am writing on behalf of Redbed Resources Corporation regarding its Mineral Exploration Project at Coates Lake, NT.

Is the proponent too late to request a 2 year extension of its current permit #MV2019C0029, or is it preferable to apply for an amendment prior to December 5th, within 60 days of the Feb 5th 2025 expiration date?

I have reviewed your October 7th letter to Jim Coyne. Any clarification and a link to required documents, as the case may be, would be greatly appreciated.

The Company has been proactive in communicating and visiting local First Nations and will continue to do so in 2025, with a visit to surrounding communities in the planning stages for the month of March or April, as weather permits.

Thank you kindly for any assistance you may provide,

Anne Bordeleau
