

Roads and Access

Access to the property is by fixed wing to Discovery Lake, or by rotary aircraft to site. Winter road access is off of Highway 3 at Prosperous Lake along a established route used in past operations by this operator. See Location Map (attached).

At the Camp and Mine site, established trails access all referenced locations. Grading and top dressing of these route will be completed to maintain structure.

A new route, currently a ground-truthed trail is shown on the Infrastructure Map (Attached). It is the 470 m long red line extending along the south-side of the esker, crossing a depression in the esker near its west-end, continuing past the explosives storage area to the dry stake tailing location. No other roads will be completed.

Local trails are cut for foot trails, using hand tools only will be limited to <1.5 m in width.
