Hi Tyree and Wendy,

Below is the response from DFO regarding extending the work end date for the Liard River ferry landings.

Let me know if you need any further details

Thanks!  
Joyce

Hello Joyce

There will be no impacts on LOA. because the location is already disturbed, there is widespread fish habitat and no risks of impeding migration or other fish life history processes, DFO has no concerns. Please notify us if you have caused or are about to cause the death of fish or harmful alteration, disruption, and destruction of fish habitat other than what was included in your RFR.

Regards,  
Tatiana

Hi Tatiana and Natalie,

I wanted to reach out regarding this work in the Liard River. We have run into issues on the construction procurement side of things and are looking to extend the end work date from Sept 18 to October 21.

I wanted to reach out to you and see how this might impact our LOA that was issued. Please let me know if you would like to schedule a quick chat to discuss this.

Thank you  
Joyce

Hello Joyce,

Following a conversation with Cam, just wanted to confirm that we do understand the works will be conducted during the Restricted Activity Period – because the location is already disturbed and widespread fish habitat and there are no risks of impeding migration or other fish life history processes, DFO has no concerns.

Regards,  
Tatiana

Hello Damian and Joyce,

Thank you for submitting a Request for Review for the dredging works at the Liard River ferry landing. DFO has reviewed the proposed works and has determined that the works are not likely to result in the harmful alteration, disruption, or destruction of fish habitat or death of fish by means other than fishing with the incorporation of suitable avoidance and mitigation measures. Please see the attached Letter of Advice.

We ask that you please notify DFO 10 days in advance of in-water works and ensure that a copy of this Letter of Advice is on-site at all times.

Have a great day!

## Natalie Grishaber
