---

Hi Dinah,

As per your attached email request and the email confirmation from the City of Yellowknife's SAO, Sheila Bassi-Kellett, you are approved to use the City of Yellowknife Solid Waste Facility for waste disposal based on your estimated volumes. Please refer to the City's [Solid Waste Management](#) bylaw for more information on accepted materials, and the City's [Fees and Charges](#) bylaw for information on fees. Should anything change in the expected volumes or types of waste, please let us know.

If you have any further questions or need any other information, please let me know and I'd be happy to help in any way I can.

Thanks,

**Mike Auge**

Hi Mike

I'm assuming you are fine with this - it sounds pretty routine. As such, consider this to be approval to accept this at our SWS  
Many thanks  
SBK

Subject: Acceptance of Waste from Camp Operation

Hi

I am writing to inquire about the acceptance of non-hazardous waste from the operations of a camp related to the clean-up a federal contaminated site. We anticipate that our project, the Great Bear Lake Project, will generate approximately 5 to 20 m3/year of non-hazardous waste that will require disposal for approximately 5 years. As part of our Water Licence and Land Use Permit renewals we are looking for a letter indicating that the City of Yellowknife will accept this waste.

Thank you for your consideration,  
Dinah Elliott
