

The KAP Project – Introduction and Request to Meet

1 message

Jared Suchan <jared@integralmetals.com>

Tue, Feb 20, 2024 at 2:08 PM

To: district@allstream.net

Good Afternoon,

I am pleased to reach out as the Vice-President of Exploration for Integral Metals, a Canadian-based mineral exploration company. We recently staked six new mineral claims (15 km x 5 km area) in the Mackenzie Mountains to establish the KAP Property – centered at [63.280062° and -126.86263°](#) (*click link to see point on Google Maps*). After compiling historic work in the area, I'm excited to share that the project has the merit for an exploratory work this year, and I would like to discuss the next steps with you.

I recognize that this project is close to or within your jurisdiction, and the first phase of our program is to begin establishing a relationship that is based upon mutual trust and respect with all parties potentially impacted by work on this project. My company would like to apply for a Type A Land Use Permit, and I want to ensure that any of your concerns are heard and addressed prior to the application. Furthermore, I would like to establish a plan for future communication. Once a permit is obtained, there are several activities planned for this year, including:

- 1) construction of a small camp and fuel cache;
- 2) completion of a small-scale exploration drilling program;
- 3) completion of a drone-supported geophysical survey; and,
- 4) completion of a hand-sampling and geologic mapping program.

I would be happy to answer any questions about Integral Metals, and would appreciate the opportunity to introduce myself virtually or over the phone at your convenience. My availability for a meeting may be found [here](#) (*click link to view calendar*) - please select a day and time that fits your schedule, and include any guests that you would like to join the session.

Thanks,

Jared

Hi Louise,

Thank you for getting back to me so quickly! To help diagnose the problem:

- Just to clarify, the zipped folder "["KAP Property Mineral Claims"](#) contains the sub-files needed to open the shapefile in a mapping program such as ArcGIS or QGIS. This data was used to help create the included map.
- If there's trouble downloading the files from Google Drive, I can try sending the zipped folder via email instead of using Google Drive.
- If there's trouble opening the file in ArcGIS or QGIS, I can re-export and re-send

As requested, I have created a PDF map that shows the individual claims.

If there's any other comments or questions, please let me know!

Thanks,

Jared

Good Afternoon Louise,

I hope all is well with you, just following up to see if there's any questions or comments regarding the KAP project that I could help answer.

I will be in Tulita on the 27th this month for a visit, and was wondering if you might be around to say hello!

Thanks,

Jared

Good Morning Louise,

I had actually just penciled in "all-day" as I wasn't sure what time works best for you!

For planning, I should be landing in town around 9:30am, and am scheduled to meet with the directors of the Tulita Land Corporation at 5:00pm - otherwise I am free.

Let me know what works for you that day!

Thanks,

Jared

Good morning, I may have suggested that 12 PM to 1:00 PM is a good time for the Board members. Some work during the day, and usually we meet at lunch time.

Where is your flight coming from?

Thanks,
Louise

Good Morning Louise,

I had actually just penciled in "all-day" as I wasn't sure what time works best for you!

For planning, I should be landing in town around 9:30am, and am scheduled to meet with the directors of the Tulita Land Corporation at 5:00pm - otherwise I am free.

Let me know what works for you that day!

Thanks,

Jared

Good Evening Louise,

I hope this email finds you well! It has been about a month since my last visit to the Sahtu region, and I would like to provide some updates and requests as we move forward into the summer season.

Updates

- Our company's fundraising campaign is underway, and while the capital markets have been a challenge lately, we still aim to raise enough funds to perform exploration activities on the KAP project this summer.
- The documents pertaining to the Land Use Permit (LUP) for drilling activities have been prepared and are ready for submission to begin public review. The LUP is planned to be submitted to the SLWB on Monday, and notification is anticipated in mid-July.
- A professional archaeologist has been contracted to conduct a desktop Archaeological Overview Assessment (AOA) of archaeological and historical data, and an analysis of the physical attributes of the project area. This information will be used in conjunction with a Traditional Knowledge (TK) study to identify where archaeological sites are expected to be located. The AOA results are expected by the end of May.
- A professional geologist has been contracted to conduct an orientation study on the project, to validate the geochemistry of previously identified mineral showings, and to confirm past drill collar locations. The work is planned for mid-May.
- A soil geochemistry program is being developed to help identify areas of potential mineralization. The work plan is under development, and tentatively planned for mid-July.
- A diamond drill program is being developed to test known areas of mineralization, and to test areas of geochemistry and geophysical anomalies. The work plan is under development, and tentatively planned for August.

Requests

- I would like to commence a TK study for the project as it pertains to the project area, including community benefits, archaeological sites, wildlife, and the environment. Please provide a date and time that works for a virtual meeting or phone call to discuss next steps forward.
- As work plan developments are underway, I would like to be able to plan to include local equipment and personnel where possible. If available to your group, please provide a list or database of contractors that are available to support exploration activities.

As always, please reach out anytime if there's anything that you would like to discuss.

Thanks and have a great weekend,

Jared

The KAP Project – Introduction and Request to Meet

1 message

Jared Suchan <jared@integralmetals.com>

Tue, Feb 20, 2024 at 2:09 PM

To: executivedirector@tulitalandcorp.ca, assistant@tulitalandcorp.ca, president@tulitalandcorp.ca

Good Afternoon,

I am pleased to reach out as the Vice-President of Exploration for Integral Metals, a Canadian-based mineral exploration company. We recently staked six new mineral claims (15 km x 5 km area) in the Mackenzie Mountains to establish the KAP Property – centered at [63.280062° and -126.86263°](#) (*click link to see point on Google Maps*). After compiling historic work in the area, I'm excited to share that the project has the merit for an exploratory work this year, and I would like to discuss the next steps with you.

I recognize that this project is close to or within your jurisdiction, and the first phase of our program is to begin establishing a relationship that is based upon mutual trust and respect with all parties potentially impacted by work on this project. My company would like to apply for a Type A Land Use Permit, and I want to ensure that any of your concerns are heard and addressed prior to the application. Furthermore, I would like to establish a plan for future communication. Once a permit is obtained, there are several activities planned for this year, including:

- 1) construction of a small camp and fuel cache;
- 2) completion of a small-scale exploration drilling program;
- 3) completion of a drone-supported geophysical survey; and,
- 4) completion of a hand-sampling and geologic mapping program.

I would be happy to answer any questions about Integral Metals, and would appreciate the opportunity to introduce myself virtually or over the phone at your convenience. My availability for a meeting may be found [here](#) (*click link to view calendar*) - please select a day and time that fits your schedule, and include any guests that you would like to join the session.

Thanks,

Jared

Hi Andrew,

Thanks for taking my phone calls last week to discuss logistics! Considering the last-minute activities with the winter road in early-to-mid March, how does the following plan sound:

I fly into Norman Wells late on the 25th, stay the 26th, head out to Tulita the morning of the 27th, and return home on the 28th. Would meeting in Tulita on the 27th work for you and the team?

Thanks and have a great weekend,

Jared
