Subject: W2023J0005 - GNWT - ECC - Notice of TERS Seasonal Shutdown
Date: September 17, 2024 2:47:49 PM

Good Afternoon,

In accordance with the conditions of the LUP W2023J0005, we have closed up the Tundra Ecosystem Research Station at Daring Lake for the season of 2024. We plan to operate on-site for up to a week near the end of October 2024 with a total of 3-6 people where only basic amenities of the station will be used.

Please consider this as a notification for the 2024 seasonal shut down of the land-use operation of GNWT-ECC-TERS – W2023J0005.

Thank you,
Colin Modeste-Burgin
