

Engagement Plan V3.0

Effective date: October 2024

Diagras Project - Hardy Lake Area, Northwest Territories

Northwest Territories Mining District

Arctic Star Exploration Corp.
#1100 – 1111 Melville Street
Vancouver, BC, V6E 3V6

October 2024

Plain Language Summary

This Plan outlines Arctic Star Exploration Corp.'s approach to Engagement, the process under which it Engages and Engagement triggers. This Plan also contains the current consultation log (**appendix A**) and project description (**appendix B**).

Revision History

The previous Plan was submitted by Margaret Lake Diamonds for the Diagrass property 2018.

Revisions are largely administrative.

Revision Date	Section	Revision
Sept 2018	Throughout	Updated Company contact
Sept 2018	Project Description	Updated to be current
Sept 2018	Engagement Plan V2.0	include updated engagement records of face-to-face meetings
Oct 2024	Throughout	Change Margaret Lake Diamonds Inc. to Arctic Star Exploration Corp.
Oct 2024	Preface	Add Glossary and Abbreviations Table
Oct 2024	Introduction	Update contacts name changes
Oct 2024	Engagement Triggers	Update contacts names and numbers
Oct 2024	Appendix A - Engagement Log	Addition of recent activity
Oct 2024	Appendix B	Update project description to be current

Introduction

Arctic Star Exploration Corp. intends to advance its exploration efforts on the Diagas Project, Hardy Lake area, with a commitment to actively engage First Nations, Crown-Indigenous Relations and Northern Affairs Canada (CIRNAC) and the Wek'èezhìi Land & Water Board (WLWB).

The Company will also engage with any interested nearby communities, regulatory agencies and Non-Government Organizations (NGO's) in order to both provide awareness and address concerns raised as a result of its exploration activities.

The Diagas project is currently in a very early exploration stage. There have been kimberlites (the host rock that may contain diamond) discovered by previous explorers as well as the Company but no economic deposit has been proven. This Engagement Plan is intended to provide a means for open communications and sharing of information with interested parties as the project advances. In the event that the project scope changes in any significant way the Company would re-evaluate the existing plan, establish dialogue to discuss the changes and then work towards development of a more comprehensive Engagement Plan.

Engagement Plan

Developing open and transparent communications during the life of both the permit and any future licenses will provide more clarity and assistance for the process of engaging all parties. Engagement of affected parties and the public in general will help build co-operative working relationships and support for the Project. It will also serve to bring forward important issues, minimize delays due to opposition from misinformation and allow Arctic Star to become better informed on issues affecting First Nations people of the region and the sensitivity of land use operations. Phase 1 communication is provided by the Company during the early consultation period prior to application for Land Use Permits and/or Water Licenses.

The benefits of the Engagement Plan apply to both the proponent and potentially impacted parties. The Plan will provide structured dialogue for communications with the various governments and organizations which will be impacted throughout the life of the project. The Plan encompassed in this document will define the ongoing commitment of Arctic Star to the various groups. Exploration activities and in particular, anything that changes the scope of the current project will be discussed before, during and after with the affected groups.

The formal engagement and communication process will consist of:

- Communications that ensure adequate time for sharing information and review.
- Open two-way communications with aboriginal governments and organizations in order to share information and maintain an open dialogue.
- The use of plain language when describing the technical aspects of the program.
- Implementation of the Engagement Plan with follow-up reporting and review.

Types of engagement which will be conducted under the guidelines of the Plan will consist of:

1. In Person Meetings.
2. Electronic mail (email).
3. Fact Sheets.
4. Community Meetings.
5. Phone calls

Email will allow Arctic Star to communicate with affected parties and obtain their input in order to address Project related issues. Fact Sheets will provide clarity of information in plain language in order to reduce misinformation and public concerns. Phone calls will provide follow up to newly disseminated information and ensure receipt. Physical In-Person Meetings would likely take place as Zoom video calls to reduce unnecessary risks of COVID related issues. These will however still allow for direct discussion of specific issues, initiatives and the addressing of any concerns. Community Meetings if warranted could be established in order to allow the public to hear relevant Project information with an opportunity to ask questions and make comments. These would first need to be vetted by all parties involved with respect to COVID related issues. Arctic Star's goal is to provide firsthand information, engagement and involvement.

Engagement Process

Preparation

- Project Description
- Identification of Issues and Affected Parties
- Initiate Dialogue

Communication

- Informative
- Open
- Engaging
- Active Participation

Implementation

- Put Plan into Action
- Receive Feedback and Sharing of Ideas.

Modification

- Evaluation and Assessment
- Modify Plan

Conclusions

If Arctic Star finds it is in a time of limited or no activity, there will be less engagement as there will be little news or information to share. Any change in the scope of activity would be communicated directly to the affected parties and recommendations sought on how to engage related groups with ongoing communications. This will allow Arctic Star to maintain good two-way communications with affected parties, establish constructive dialogue and ultimately provide benefit to Arctic Star and all affected parties. Arctic Star's main contact will be Buddy Doyle (V.P. Exploration) in regards to receiving information directly from the Company on engagement initiatives and for technical aspects of the exploration program. From time-to-time Mr. Doyle may appoint or delegate alternative individuals. Buddy Doyle (buddy@arcticstar.ca).

The Engagement Plan attached is included for review, discussion and comments by the affected parties prior to finalization. Once finalized, the plan will be followed up on by Arctic Star with an ongoing annual review for the life of the project. Arctic Star is dedicated to making any necessary revisions to reflect changes in engagement activities, changes in project scope, or as directed by the relevant Land & Water Board. Any revisions will be submitted to the Wek'èezhìi Valley Land & Water Board (WLWB) for approval.

Engagement Triggers

Pre-Application Phase

Engagement Trigger	Purpose of Engagement	Contact / Person	Format	Record
Land Use Permit/ Water License pre-application	Introduction to the project, request for Archaeological data	PWHC – Glen Mackay	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Requested a contact list from WLWB for interested parties relating to the Diagrass project area.	WLWB – Anneli Jokela, Roberta Judas	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	WRRB – Jody Pellissey	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project, request for private land/lease holders	GNT Lands - ECCC – Scott Stewart, Clint Ambrose	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project, request for private land/lease holders	GNWT-ENR Biologist - James Hodson	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	Akaitcho IMA - Ethel Lisk	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	KIA – Katrina Hatogina	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	North Slave Metis Alliance – Marc Whitford, Alan Alex, Noah Johnson	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	Tli Cho Government – Violet Camsell-Blondin, Grace Mackenzie	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	Lusel K'e Dene FN – Tas-Tsi Catholique	E mail +/- phone call	Responses
Land Use Permit/ Water License pre-application	Introduction to the project	Yellowknife Dene – Johanne Black Ryan Miller	E mail +/- phone call	Responses

Land Use Permit/ Water License pre-application	Introduction to the project	Deninu Kue FN - Sam O'Reilly	E mail +/- phone call	Responses
--	-----------------------------	------------------------------	-----------------------	-----------

Application Phase

Engagement Trigger	Purpose of Engagement	Contact / Person	Format	Record
Land Use Permit/ Water License pre-application	Application form submittal along with work plans to be disseminated by WLWB for public review	WLWB - Anneli Jokela, Roberta Judas	Email submission Relevant information disseminated by WLWB on their website and by public notice	Application and accompanying documents in public records

Project Planning Phase

Engagement Trigger	Purpose of Engagement	Contact / Person	Format	Record
Planning of exploration work prior to awarding contracts or submitting work plans to GNT-Lands	Meeting to engage most directly affected FNs such that they can be interactive during the planning of work programs.	Akaiicho IMA - Ethel Lisk Tli Cho Government – Violet Camsell-Blondin, Grace Mackenzie North Slave Metis Alliance – Marc Whitford, Alan Alex, Noah Johnson Lusel K'e Dene FN – Tas-Tsi Catholique Yellowknife Dene – Johanne Black, Ryan Miller Deninu Kue FN - Sam O'Reilly	Emails, calls or Zoom meetings to engage the communities at the planning stage of the exploration program	Meeting minutes will be recorded

Exploration Work Phase

Engagement Trigger	Purpose of Engagement	Contact / Person	Format	Record
Diamond drilling	Provide communities opportunity to participate in work programs and to	Akaiicho IMA - Ethel Lisk Tli Cho Government – Violet Camsell-Blondin, Grace Mackenzie	Email and phone notification of plans. Zoom meetings could be held	Email, engagement records, camp and work records, as well as minutes to any meetings

	observe through on-site monitoring	North Slave Metis Alliance – Marc Whitford, Alan Alex, Noah Johnson Lusel K'e Dene FN – Tas-Tsi Catholique Yellowknife Dene – Johanne Black, Ryan Miller Deninu Kue FN - Sam O'Reilly		
Annual Updates	Updates on work progress and exploration success. Future work that may require planning	Akaitcho Territory Government Tli Cho Government North Slave Metis Alliance Deninu Kue FN Lusel K'e Dene FN Yellowknives Dene FN WLWB GNWT – Lands GNWT - ENR KIA	Email or phone updates on work progress and shut downs meetings. Zoom engagement meetings could be held.	Email, engagement records, camp and work records, as well as minutes to any meetings
Change in Scope of work proposal	Drafting of more comprehensive plans for all aspects of work affected by change of scope, including engagement plans, and the possible development of a Wildlife and Wildlife Habitat Protection Plan. A comprehensive Archeological Overview Study including traditional knowledge studies should be undertaken if the project scope grows significantly larger.	Akaitcho Territory Government Tli Cho Government North Slave Metis Alliance Deninu Kue FN Lusel K'e Dene FN Yellowknives Dene FN WLWB GNWT - Lands GNWT - ENR Prince of Wales Northern Heritage Centre KIA	Engagement with WLWB as well as GNWT-Lands. Emails, calls, Zoom. Engagement with effected parties to discuss changes and possible impacts. Emails, calls, Zoom. 2017 - 2024 Consultation Log

Date	Form	Group	Contact	Description	Response
03-Feb-2017	Tom_andrews@gov.nt.ca	PWHC	Tom Andrews	Requested archaeological site data for within Diagras claim boundary	Received data 08-Mar-2017
15-Feb-2017	mschnurr@wlwb.ca	WLWB	Meghan Schnurr	Requested a contact list from WLWB for interested parties relating to the Diagras project area.	15-Feb received list and guidelines from Sara Elsasser at WLWB selsasser@wlwb.ca
18-Aug-2017	screeningofficer@eastarm.com	Akaitcho IMA implementation office	Stephanie Poole	Letter to Interested Parties was sent containing Diagras project description and intent to apply for LUP	
18-Aug-2017	dirlands@kitia.ca , srenvironment@kitia.ca	KIA	Geoff Clark Luigi Torretti	Letter to Interested Parties was sent containing Diagras project description and intent to apply for LUP	
18-Aug-2017	Scott_stewart@gov.nt.ca	GNT Lands	Scott Stewart	Letter to Interested Parties was sent containing Diagras project description and intent to apply for LUP. Inquired about private land and lease holders.	Email referred to Clint Ambrose
18-Aug-2017	Shin.shiga@nsma.net general@nsm.a.net	NSMA	Bill Enge Shin Shiga	Letter to Interested Parties was sent containing Diagras project description and intent to apply for LUP	21-Aug, Mr. Shiga email requesting additional information about camp size, water usage, timing and Plan submittal. 25-Aug, MLD addressed questions via email.

					28-Aug, Mr. Shiga (email) thanked MLD for the responses and wished the company luck with the project.
18-Aug-2017	lauraduncan@tlichogov.com	Tlichogov	Laura Duncan	Letter to Interested Parties was sent containing Diagrass project description and intent to apply for LUP	
18-Aug-2017	Tom.andrews@gov.nt.ca Glen.mackay@gov.nt.ca	PWHC	Tom Andrews Glen Mackay	Letter to Interested Parties was sent containing Diagrass project description and intent to apply for LUP	
18-Aug-2017	jpellissey@wrrb.ca	Wek'èezhii Renewable Resources Board (WRRB)	Jody Pellissey	Letter to Interested Parties was sent containing Diagrass project description and intent to apply for LUP	18-Aug, "will be in touch if any concerns"
21-Aug-2017	867-767-9347 Ext 71253	PWHC	Julie Buysse	Requested additional archaeological site data for a 6km buffer around claim boundary.	Amended data was provided
22-Aug-2017	867-446-0769	GNT Lands	Clint Ambrose	Asked if there were any private landholders or lease holders in the project area as per WLWB info sheet	None currently
06-Oct-2017	867-766-4003	Tlichogov	Laura Duncan	Called to follow up information letter. Has moved to YK and given new number. Out of office until Monday. Left message.	
06-Oct-2017	867-370-3217	Akaitcho IMA implementation office	Stephanie Poole	Called to follow up information letter.	Said she would now forward it to other parties that may be interested. LKDFN, YKDFN, Deninu Kue FN.
06-Oct-2017	867-982-3310	KIA	Geoff Clark Luigi Torretti	Called to follow up information letter. Informed that Mr. Torretti no longer there. Ne	Informed that Mr. Torretti no longer there. New contact Ms. Wynter Kuliktana. Briefly discussed project location. Was informed that KIA decided to not formally reply upon receipt of info letter as they are extremely busy with things in NU and this project is across boarder. KIA may

					use the 42 day response period to voice comments. She mentioned there was an Elders Camp near/on Lac du Suavage that should be considered when selecting a company camp site to avoid encroachment.
06-Oct-2017	srlands@kitia.ca	KIA	Wynter Kuliktana	Forwarded Letter to Interested Parties – Info circular again as requested.	
06-Oct-2017	lkdfnlands@gmail.com	LKDFN	Mike Tollis	Letter to Interested Parties – Info Circular sent by Stephanie Poole, Akaitcho IMA implementation office	17-Oct. Called and was told that Mr. Tollis no longer there and given Mr. Shonto as a contact – 867-370-7012. Tried to leave message but voice box repeatedly full.
06-Oct-2017	ima_dkfn@northeast.net 867-394-4335	Deninue Kue FN	Rosy Bjornsen	Letter to Interested Parties – Info Circular sent by Stephanie Poole, Akaitcho IMA implementation office	13-Oct, called Ms. Bjornsen and briefly reviewed letter. She inquired as to what formal engagement plan the company has and was informed that it would be part of the formal LUP application documents and could be reviewed then. She also described the products and services applicable to exploration companies that were available from the community.
06-Oct-2017	apower@ykden.com 867-766-3496	YKDFN	Alex Power	Letter to Interested Parties – Info Circular sent by Stephanie Poole, Akaitcho IMA implementation office	Called 17-Oct. Briefly reviewed the letter with Mr. Power and answered a few initial questions.
13Oct2017	867-766-4003 jimmartin@tlicho.com	Tlicho Gov	Jim Martin	Called and was provided interim contact as Ms. Duncan is on personal leave until January. Interim contact Jim Martin	Mr. Martin asked to be re-sent information letter and would acknowledge receipt.
15Nov2017	Face-to-Face Yellowknife	NSMA	Nicole Goodman	Introduced Company to Ms. Goodman. Provided map overview of projects as well as detailed project specific information. Engaged in conversations regarding employment opportunities, wildlife and continued relations.	The Company discussed addressing wildlife concerns by strictly adhering to the Land Use permit and any other regulatory requirements. Employment opportunities may exist in the future if the program expands. In addition, typically a wildlife monitor is hired

					from a local community to further address wildlife concerns. when the program reaches the drill stage Ms. Goodman was thankful for the meeting and contact information was exchanged so both parties could remain in contact.
15Jan2018	Face-to-Face Yellowknife	NSMA	Marc Whitford, Vice President Nicole Goodman, Lands Environment	Company President & CEO Paul Brockington and Indigenous and Community Liaison Dr. John Belhumer provided a presentation on the Company and Diagras and Margaret Lake projects. General, open discussions followed. NSMA inquired into employment opportunities.	The Company discussed the possibility of employment as the project expands and also addressed the benefits of hiring a local wildlife monitor at the drilling stage. No concerns regarding wildlife were mentioned during the meeting. The NSMA were supportive of the project.
15Jan2018	Face-to-Face Dettah	YKDFN	Chief Edward Sangris; Chief Ernest Betsina	Company President & CEO Paul Brockington and Indigenous and Community Liaison Dr. John Belhumer provided a presentation on the Company and Diagras and Margaret Lake projects. General, open discussions followed. YKDFN inquired into employment opportunities as many of their members have been trained in mining and exploration jobs. YKDFN also inquired into sourcing services from their community. There was concern regarding drilling on lakes for the Margaret Lake property which was at the drill stage now ahead of the Diagras project.	The Company discussed the possibility of employment and services and said it will post any business and employment opportunities in the community. The Company commented that the PWNHC had no archaeological concerns with the proposed drill hole locations. Drill hole locations were provided after the meeting by email for Elders to review. No concerns regarding wildlife were mentioned during the meeting. The YKDFN were supportive of the project.
16Jan2018	Face-to-Face Fort Resolution	DKFN and FRMC represented at Face-to-	DKFN; Chief Louis Balsillie, Councillors Rosy Bjornsen, Robert Sayine,	Company President & CEO Paul Brockington and Indigenous and Community Liaison Dr. John Belhumer provided a presentation on the	The Company discussed the possibility of employment and services and said it will post any business and

Appendix B

Project Description - Arctic Star Exploration Corp.'s Diagrass Project

Project Information Update

October, 2024

INTRODUCTION

Arctic Star Exploration Corp. (ADD or Arctic) has been involved in kimberlite exploration in the Northwest Territories since its incorporation in 2001. The Diagrass property, which is the subject of this project description, is a joint venture between Arctic Star Exploration Corp. and a private company. The property is located on and to the south of Hardy Lake northeast of the Diavik diamond mine and in the Northwest Territories, Canada.

The project area has received numerous exploration campaigns by previous diamond explorers from 1992 to 2005. Previous exploration activities included airborne and ground geophysics, till sampling and drilling with which numerous diamond bearing kimberlite bodies were discovered.

The entire claim package comprising the current Diagrass property is composed of 58 mineral claims totaling an area of 47,879.34 hectares.

Arctic Star is applying to renew a 5-year Class 'A' Land Use permit (**W2017C0005**) for the purposes of mineral exploration including temporary camp establishment and drilling potentially commencing winter/spring 2025. It is anticipated the renewal will be granted prior to the expiration of the existing permit.

LOCATION, DESCRIPTION and ACCESS

The center of the Diagrass property is located approximately 340 kilometers northeast of Yellowknife, Northwest Territories, 40 kilometers northeast of Diavik diamond mine and 40 kilometers east of Ekati diamond mine. The property consists of a total of 58 mineral claims totaling an area of 47,879.34 hectares and is centered at approximately 109.80°W, 64.80°N. Refer to figure 1.

Access to the Diagrass property is via fixed wing aircraft chartered from Yellowknife, NT. In summer months float equipped planes can utilize numerous beaches for docking, and during winter, ski or wheel-ski planes can land virtually anywhere on the frozen property as there is an abundance of lakes.

In past years the Tibbitt-Contwoyto winter road was operational during February and March connecting Yellowknife, located to the south of Diagrass, and the Lupin gold mine 130 kilometers north of the project area. The winter road has historically traveled up the western side of the Diagrass property traversing eastward through the north corner. Refer to figure 1.

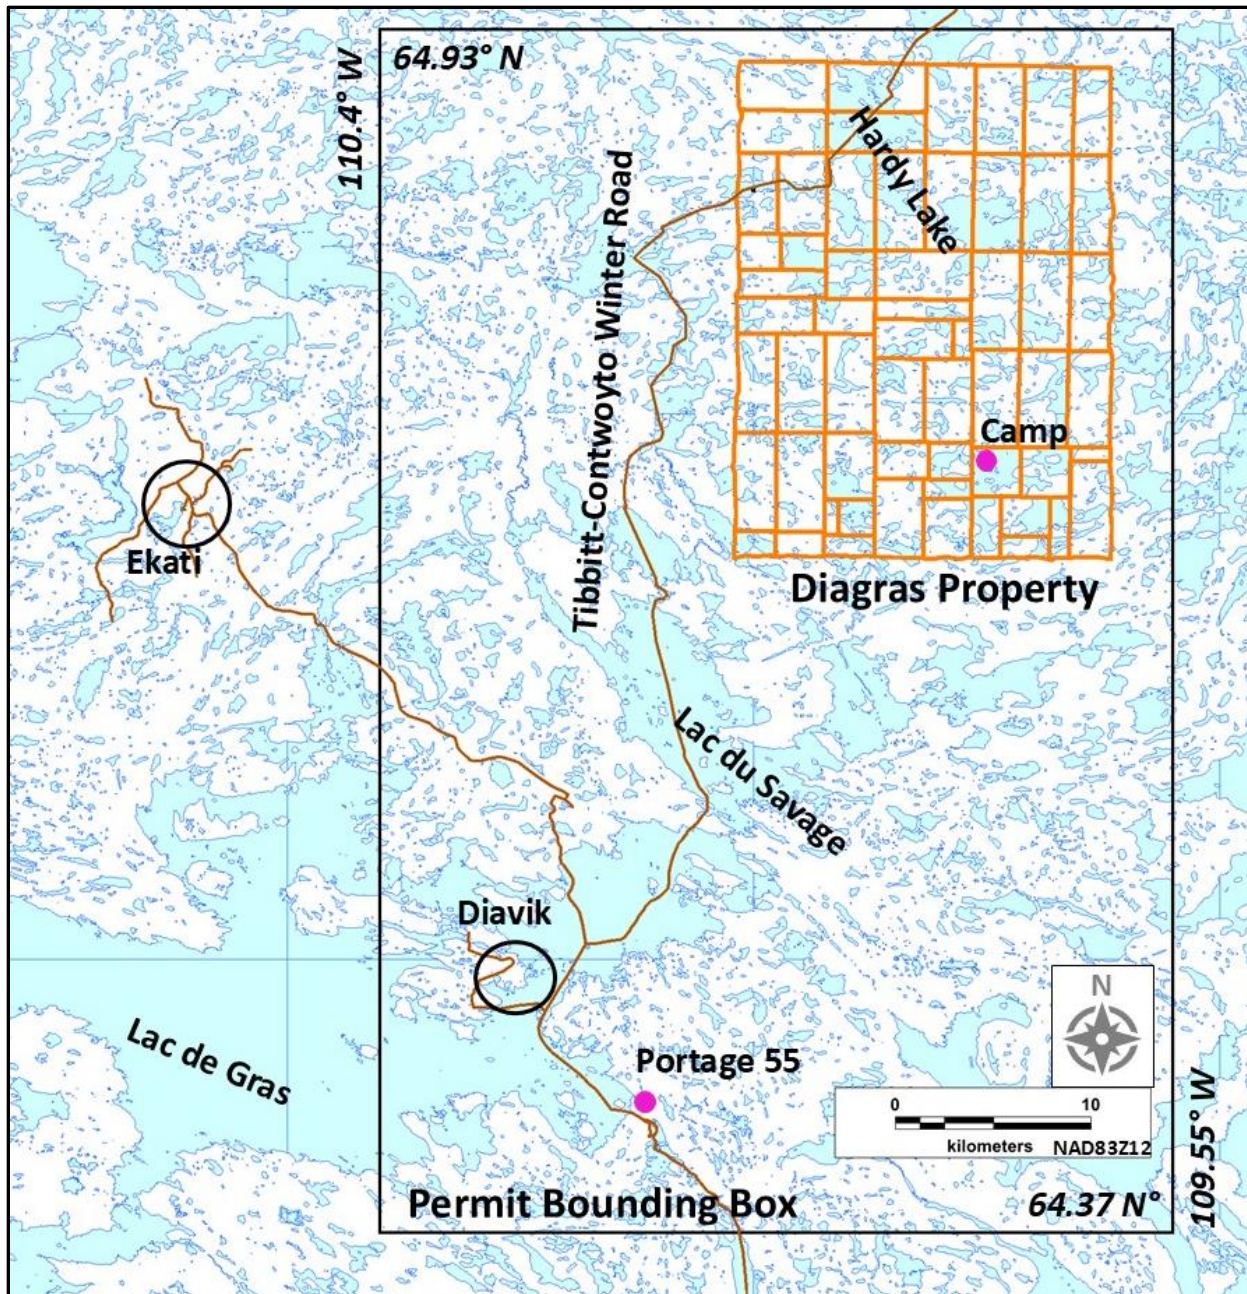

Figure 1: Diagas property location Map NAD83

PROPOSED ACTIVITIES

Arctic Star is applying to renew Land-Use permit **W2017C0005** for 5 years for the purposes of mineral exploration including temporary camp establishment and drilling potentially commencing winter/spring 2025. Upon success, exploration programs could eventually host up to 24 personnel at peak capacity and operate from early March to late October however maximum capacity would not occur for the duration as various exploration activities have preferred operational seasons and climatic requirements.

Activities to be permitted under the Land-Use permit would include:

1. Operation and maintenance of a temporary exploration camp
2. Geophysical surveys (ground and airborne)
3. Till sampling
4. Diamond core and reverse circulation drilling
5. Drill rig moving via helicopter or track mounted equipment during snow cover
6. Fuel and equipment storage
7. Temporary fuel and equipment storage outside the claims block but within the bounding box coordinates (refer to figure 1)
8. Ongoing Reclamation and Abandonment and Restoration upon final closure

Arctic Star has not yet determined specifically where the drill hole locations will be. This will be determined by a further evaluation of the exploration data. The number of holes will be determined by available financing and ongoing results.

The temporary exploration camp site location is N64° 44' 03", W109° 45' 13" on a flat, low-lying esker in the southeast quadrant of the claim block. Refer to figure 1. This discontinuous esker is located on the shores of an un-named irregular shaped lake. This location allows ample room for regulated fuel storage and grey water setbacks. See figure 2 and 3. The esker and area have been previously investigated for archaeological content in 2003 by PWNHC, Thomson, C. "Archaeological Survey of Hardy Lake, NWT", Permit # 2003-928 where *"...the team focused on areas of intensive exploration activity and eskers..."* (<http://www.pwnhc.ca/cultural-places/archaeology-program/fieldwork-reports/2003-archaeological-reports/#tab-id-3>).

Archaeological site locations have been provided to the company by the PWNHC and this camp location falls well beyond the minimum distance required from such identified sites. In addition to this, Arctic Star commissioned an Archaeological Overview Assessment in 2022. The report has been filed with the Wek'èzhìi Land & Water Board.

Figure 2: Ariel view of the camp location looking southwest

Figure 3: Ground view of camp location in shutdown 08August2024 looking southeast.

EQUIPMENT

Fuel caches will consist of 205 liter drums as well a 100 lbs propane bottles to support camp and related exploration activities such as drilling. All caches will be located in accordance of LUP permit conditions and will have spill kits available in a prominent, proximal location. The main fuel cache will be located near the camp but at a safe distance. Additional temporary fuel caches of less than 19 drums may be established for immediate consumption for drill moves and support.

Equipment used may consist of core and reverse circulation drills for target testing, helicopters for crew and equipment transport, fixed wing aircraft for crew and supplies as well as snowmobiles, pumps, generators and ancillary equipment.
